WE KNOW GLOVES

SOFT TOUCH

ABOUT SOFT TOUCH

we know gloves

Founded in Sweden 1913 with a long tradition in trading and import, the Soft Touch® brand has been among the leading glove brands since 1985.

SOFT TOUCH

Skandinaviska Råvaror was founded 1913 in Sweden. Initially the company's business focus was on the trading of leather goods within Europe, but the import business quickly expanded to include accessories for the gardening industry. The main import market, was and still is, the Far East, with China being the largest supplier.

By 1985, the company was called Soft Touch and started focusing on 'working gloves'. Our nitrile working gloves sold under the name Soft Touch quickly became a success and was followed by many more new products.

Today Soft Touch is a leading brand of gloves of all kinds and the range of products are steadily increasing with the company's in house product development. With offices in Sweden, Pakistan, Malaysia and China, we work constantly to make sure your hands will stay protected.

SOFT TOUCH GLOVES MEAN:

**Premium Quality
Swedish Design
Active Product Development
Rigorous Quality Control
Own Regular Audits**
