

the  
**M-tex™**  
principle

“

**M-tex™** is designed to provide breathable comfort and durable waterproof protection, it is ideal for a wide range of activities and requirements

**M-tex™** not only protects us from the elements, but also manages moisture and maintains proper heat balance to keep us dry, which is also an important element to staying warm. When we sweat, the perspiration that stays on our skin robs us of valuable body heat.

**M-tex™** breathable property allows moisture to evaporate rather than trapping it against the skin. This helps maintain a comfortable body temperature and keep the level of heat lost equal to the level of heat produced, which keeps us dry, and comfortable, from the inside out.

”
