VIRUS

STANDARD 100

Properties

Chemical resistant glove (type A) in extremely thin nylon with superior fit and comfort. Double nitrile coating with the outer layer in a sandy nitrile with a good grip in dry, wet and oily conditions. Protects against many harmful substances as well as viruses. Longer model, approximately 35 cm extend the protection to the forearm. OEKO-TEX 100 certified and butadiene free. Ergonomical design for lesser hand fatigue and a better user experience.

Material information

Knitted waterproof glove in 18g nylon with double nitrile coating over the entire hand.

Technical facts: Intermediate design (category II)

EN388:2016

For areas of specific risks, i.e. mechanical risks. These products will have been CE type tested against European EN388:2016 test methods and certified by a notified body. The testing is done for abrasion resistance, cut resistance, tear resistance, puncture resistance, extended cut resistance and impact protection. The maximum score for each level are; abrasion 4, cut resistance 5, tear resistance 4, puncture resistance 4, extended cut resistance F (X if not applicable) and impact protection (optional test) P if approved. Evaluate the importance of each of the properties and how it applies to you as a user.
