Kevlar.

Properties

Heat resistant gloves fully made in specially treated leather making the gloves both water and oil repellent. Goat suede leather in the whole hand with full index finger reinforcement. 8 cm long cuff in heat resistant cow split leather for added protection. Durable double stitching with heat resistant Kevlar® thread in all areas exposed to wear and tear. An elastic seam in the wrist provides a safer fit. Fully lined with a 180 grams brushed Kevlar® lining. The brushed lining increases comfort but also has insulating properties. This means that the glove can be used outdoor in colder weather without using an extra glove as a liner.

Material information

The gloves are sewn in goatskin suede leather, cow grain leather on the upper hand, cow split cuff, Kevlar® thread. Kevlar® lining 180 gsm.

Technical facts: Intermediate design (category II)

EN388:2016

a b c d e f

abrasion resistance
cut resistance
tear resistance
puncture resistance
extended cut resistance
impact protection (optional)

For areas of specific risks, i.e. mechanical risks. These products will have been CE type tested against European EN388:2016 test methods and certified by a notified body. The testing is done for abrasion resistance, cut resistance, tear resistance, puncture resistance, extended cut resistance and impact protection. The maximum score for each level are; abrasion 4, cut resistance 5, tear resistance 4, puncture resistance 4, extended cut resistance F (X if not applicable) and impact protection (optional test) P if approved. Evaluate the importance of each of the properties and how it applies to you as a user.
