| Category:  | I                                |

EN ISO 10819:2013

CATEGORY: I

## Properties

Sturdy anti vibrations glove in HiVis fabric. The inner hand and fingers have a shock absorbing gel and the thumb, index finger and little finger has gel on the sides of the fingers as well. The gel absorbs vibrations to minimize the risks for vibration injuries when working with heavy machinery. Upper hand in HiVis elastic Spandex. The inner hand is made with double layers of durable goatskin leather that has a shock absorbing gel between the layers. Sturdy grip reinforcements in goatskin. Unlined. High and tight Neoprene cuff with a broad velcro strap to secure the gloves fit. This glove works well together with HiVis clothing for road workers and other jobs where high visibility is essential.

## Material information

The gloves are sewn in goatskin leather with vibration dampening gel in the fulm palm and also the fingers. Upper hand in spandex. Neoprene cuff with a velcro lock.

## Technical facts: Intermediate design (category I)

These gloves are to be used when there is a minimal risk for the user. General requirements for safety gloves are fixed by the CE-standard. The requirements concern purpose, construction, product information, size, chrome contents (max 2 mg Chromium VI per kg) and PH-value, which must be in the range of 3,5 -9,5.
