Properties

Jokasafe JokaHold+35 is a durable vinyl coated glove with a thin cotton liner and a 35 cm long sleeve. The sleeve is made from polyester- or nylonbased PVC and offers effective protection from water and dirt. Testresults for this product is only valid for the glove part not the sleeve. A durable triple vinyl 360° coating remain flexible even at -50°C. The granulated TopGrip®-surface offers a firm grip in dry, wet or oily environments.

The vinyl in this glove is made from fossil free BIOVYN™-vinyl. Renewable BIOVYN™ reduce the carbon dioxide footprint up to 74% compared to vinyl made from traditional fossil fuels. Biovinyl products have the exact same properties as conventional fossil vinyl products making them very durable with an excellent protection against chemicals and mechanical abrasion as well as extreme weather conditions.

Material information

Fossil free vinyl (BIOVYN™), cotton, polyester

Technical facts: Intermediate design (category II)

EN388:2016

a b c d e f

For areas of specific risks, i.e. mechanical risks. These products will have been CE type tested against European EN388:2016 test methods and certified by a notified body. The testing is done for abrasion resistance, cut resistance, tear resistance, puncture resistance, extended cut resistance and impact protection. The maximum score for each level are; abrasion 4, cut resistance 5, tear resistance 4, puncture resistance 4, extended cut resistance F (X if not applicable) and impact protection (optional test) P if approved. Evaluate the importance of each of the properties and how it applies to you as a user.
